T TYPE UNDERDASH PANELS

Under dash panel kits for TA, TB, TC and TD, RHD or LHD. The kit contains black PVC for covering the panel, a paper pattern for cutting same from either ply or fibreboard, plus all the brackets, nut, bolts, screws etc. for making and fitting, together with instructions.

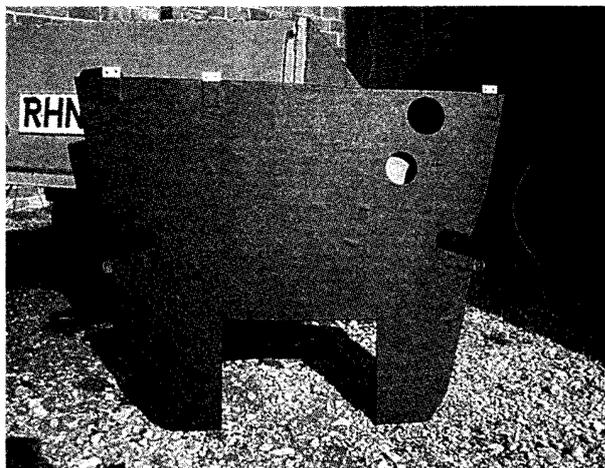

I also have in stock the fibreboard panels already cut out for these. However they are rather large for sending, since they are even bigger than the boxes in which I put my complete interiors. So only if several were ordered would it be feasible to pack them separately and send. I do of course make up the complete under dash panels, but these are definitely only for visitors to my workshop.

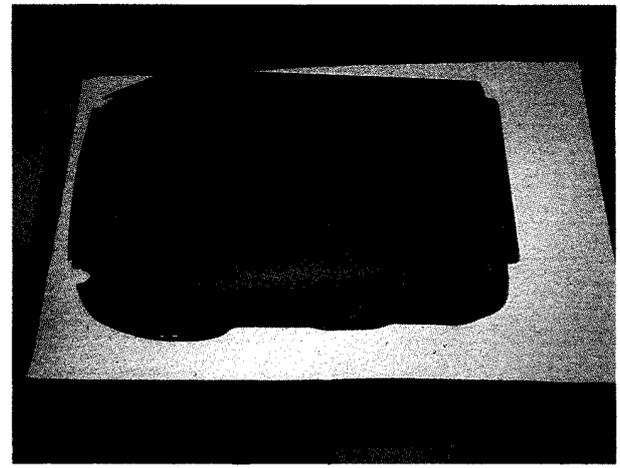

TA/TB under dash panel

TC under dash panel

TD under dash panel, RHD.

TF Fibreboard under dash panels, ready formed for RHD or LHD cars.
